# Introduction

EMA App is an energy monitoring application for smart phones, designed for end users of APsystems Microinverter Products. Users can check the real-time performance, historical power output, and environmental benefits of their PV systems.

# 1. Login EMA App

## 1.1 Install APP

Android:

- Open <https://apsystems.com>
- Select your region
- Click the tab menu "Apps" below "Products"
- Download App for Android

Note:

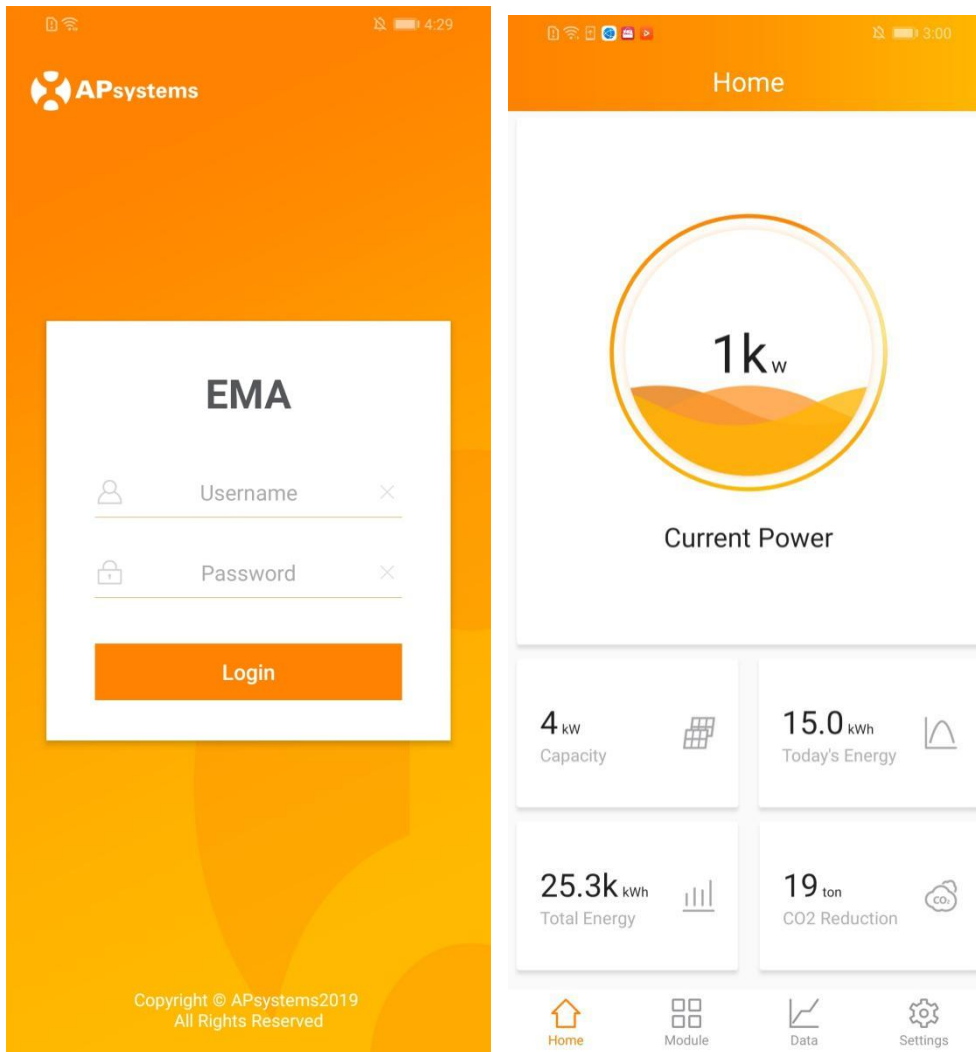

EMA App requires Android 5.0 or above

IOS:

- In programming and wait to publish

## 1.2 Login EMA App

- Input username and password
- Click "Login"

**Note:**

Once you login EMA App successfully, the app will login your account automatically the next time you open it when you have not logout you account.

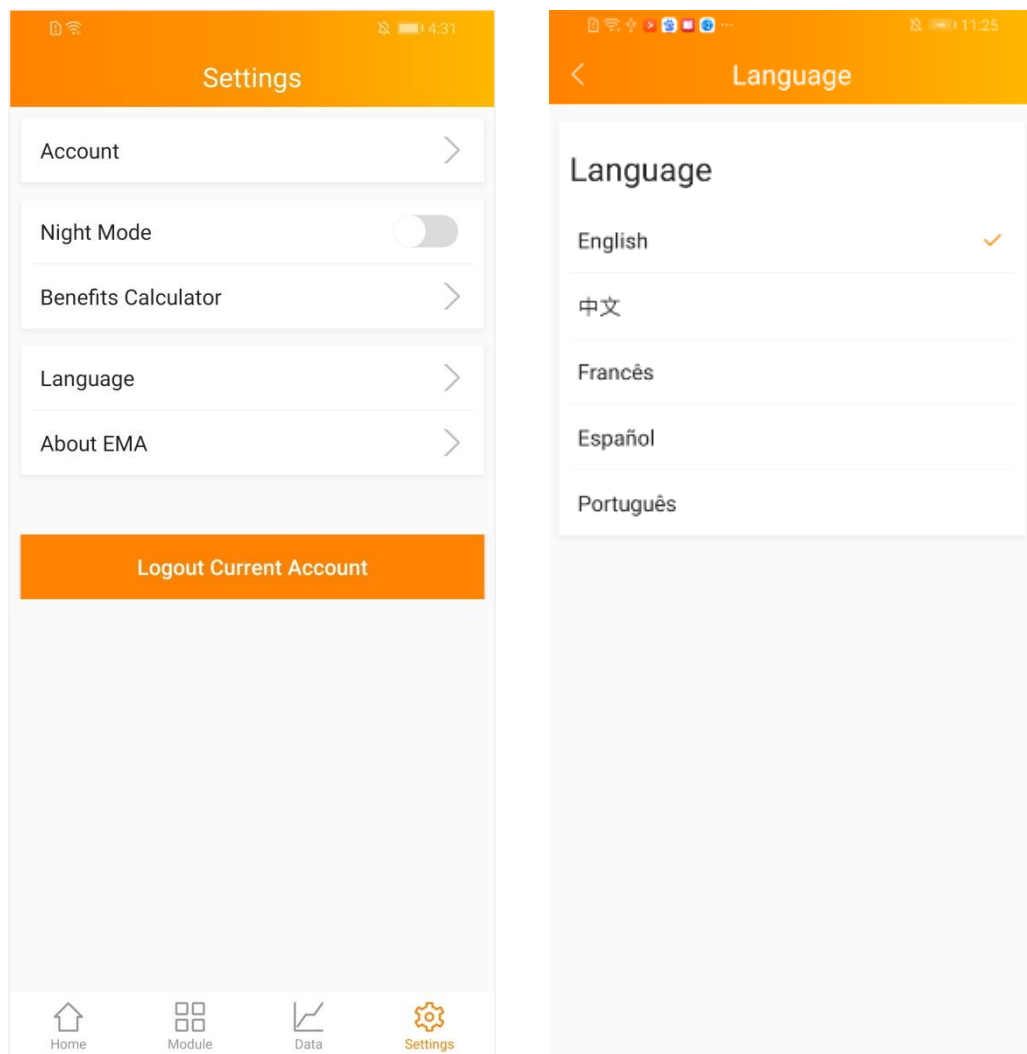

The App's default language is English. See "2.1.1 Set Language" to change the language.

## 2. Function

### 2.1 Settings

#### 2.1.1 Set Language

- Login EMA App
- Click "Language" in page "Settings", change the language

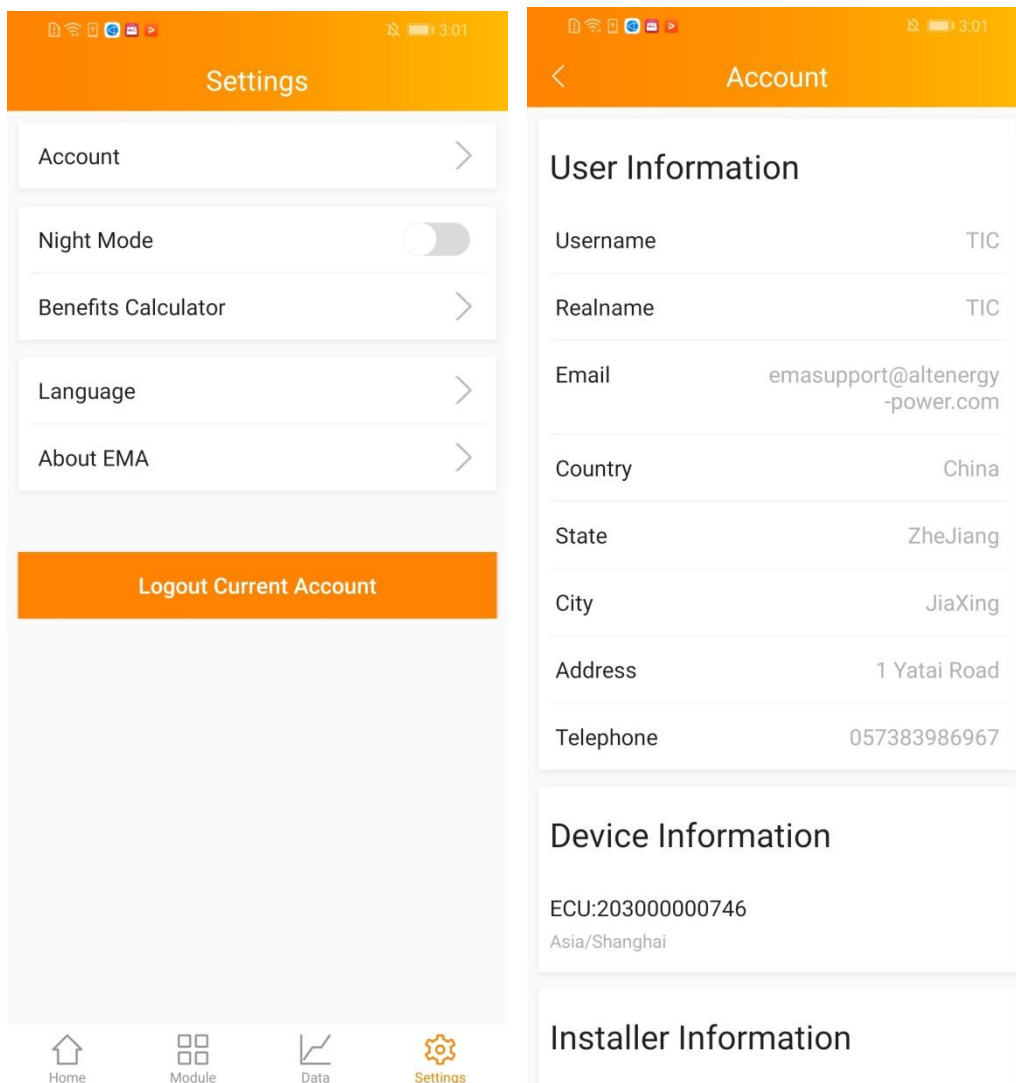

**Note:**

Once the language is changed, EMA App will turn to page "Home" automatically.

## 2.1.2 View Account Information

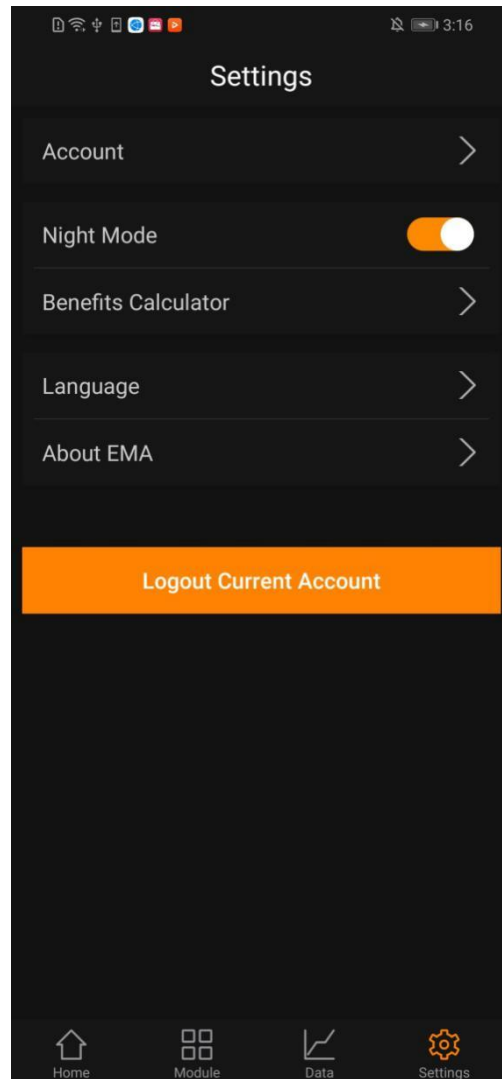

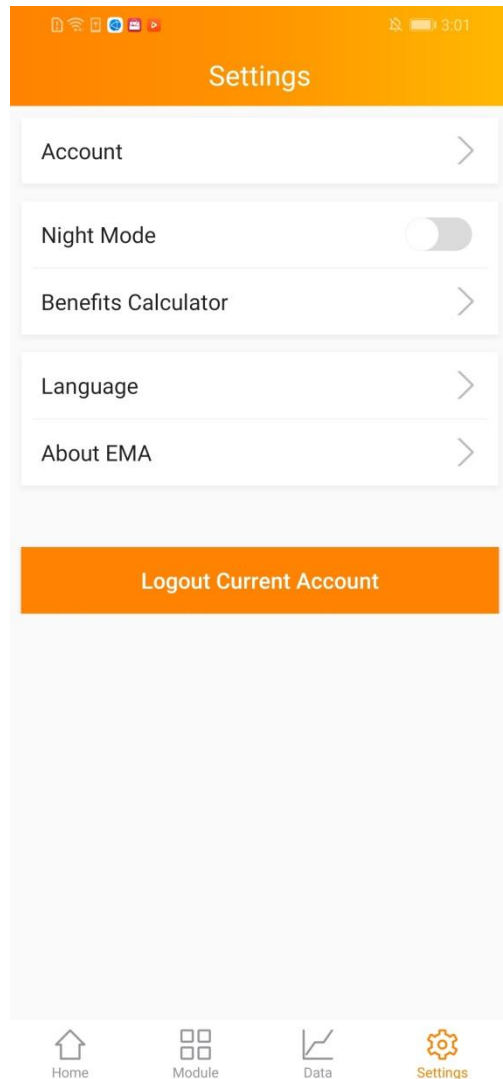

- Click "Account" in page "Settings".

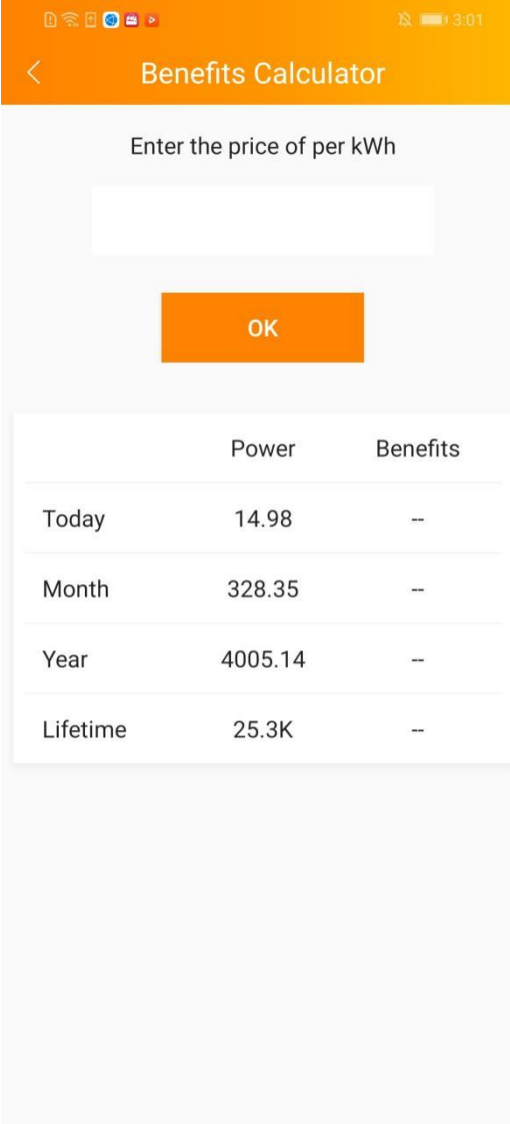

## 2.1.3 Set Night Mode

- Switch On "Night Mode" in page "Settings"

## 2.1.4 Calculate Benefits

- Click "Benefits Calculator" in page "Settings"
- Input the price per kWh

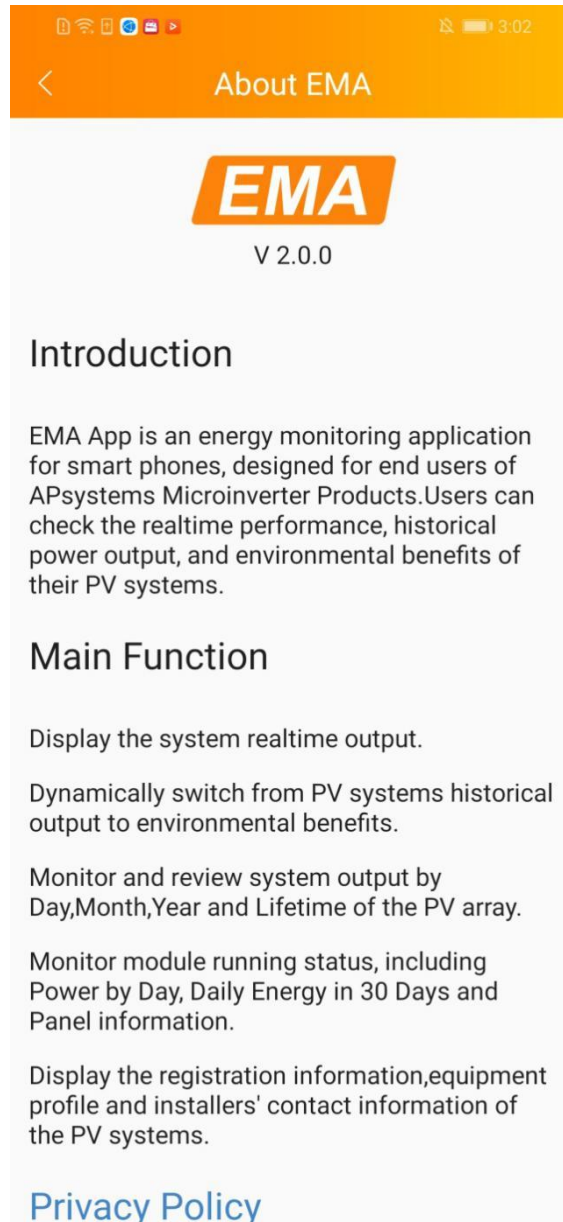

The screenshot displays the 'Benefits Calculator' app interface. At the top, there is a yellow header with a back arrow and the title 'Benefits Calculator'. Below the header, the text 'Enter the price of per kWh' is displayed above a white input field. An orange 'OK' button is positioned below the input field. At the bottom of the screen, a table is shown with two columns: 'Power' and 'Benefits'. The table contains four rows of data: 'Today', 'Month', 'Year', and 'Lifetime'. The 'Power' column shows values 14.98, 328.35, 4005.14, and 25.3K respectively. The 'Benefits' column shows dashes '--' for all rows.

	Power	Benefits
Today	14.98	--
Month	328.35	--
Year	4005.14	--
Lifetime	25.3K	--

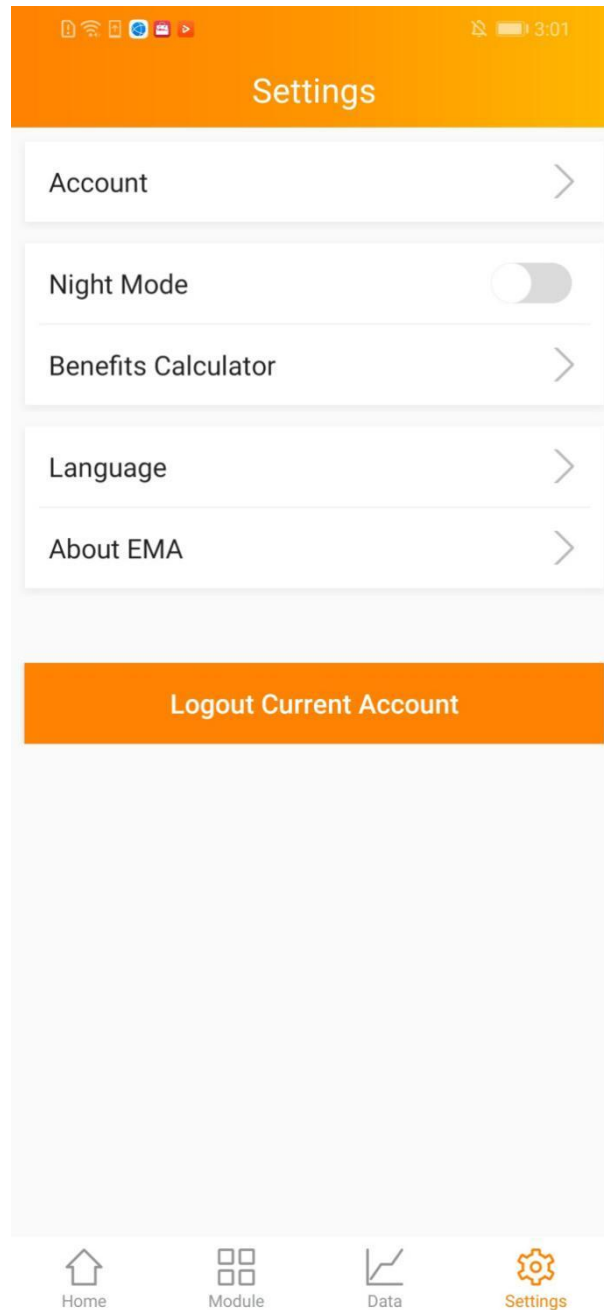

## 2.1.5 View EMA App's Description

- Click "About EMA" in page " Settings"

## 2.1.6 Logout EMA App

- Click "Logout Current Account" in page "Settings"

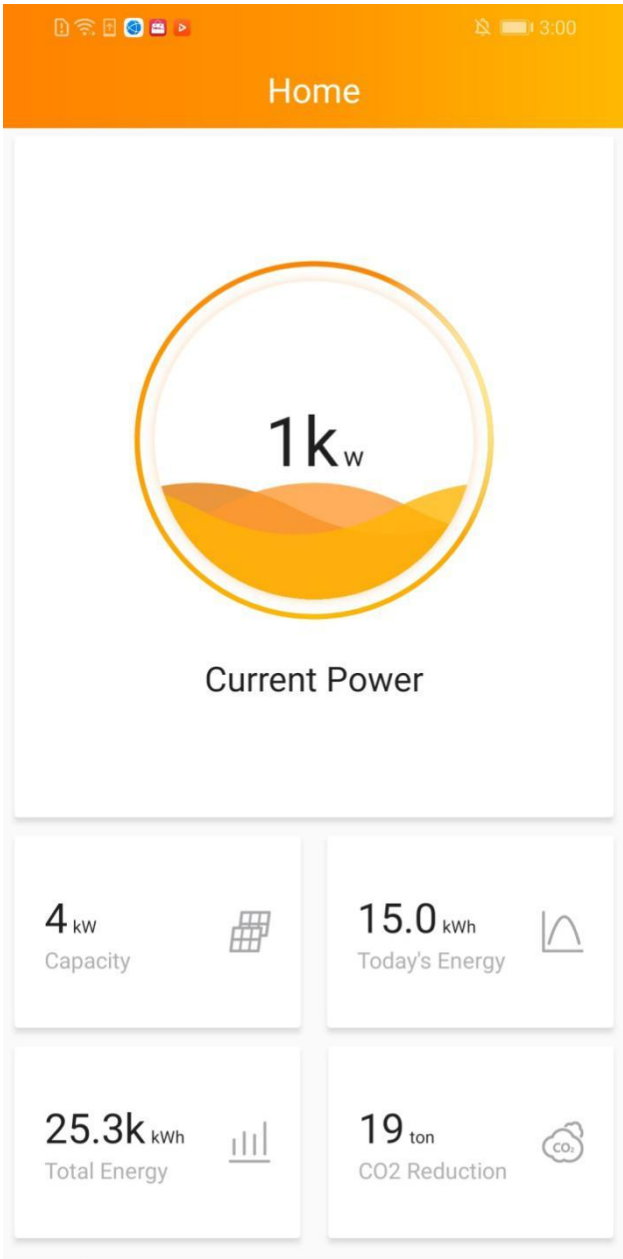

## 2.2 Home

You can view a summary information of your PV system, containing the real-time power, the system's capacity, today's energy, total energy and CO2 reduction.

### 2.2.1 View Real-time Power

- Turn to page "Home"
- The Real-time Power is shown in the power ball

Home

Data

Settings

## 2.3 Module

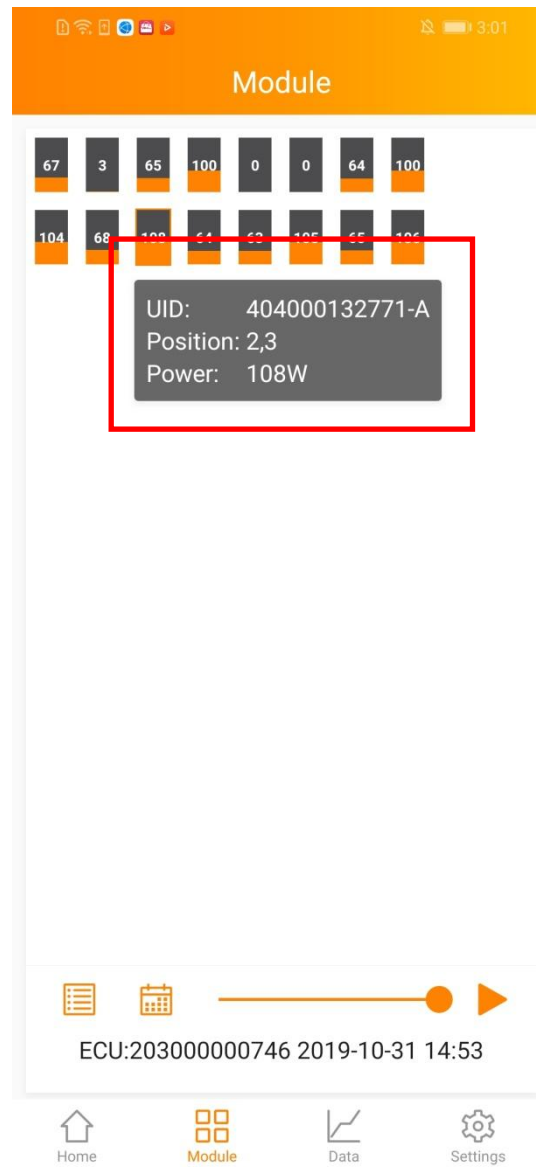

You can view the running details of each module in the manual view or auto view, containing the power generation in day and the daily energy in 30 days. Also you can click one of them to get the module details.

- Resize the modules by the move gestures through two fingers.

## 2.3.1 View the Details of Module

Click one of the modules to get the details.

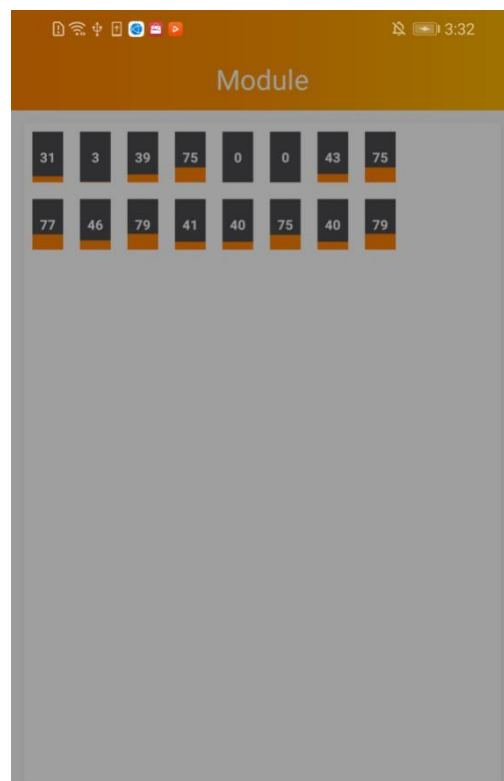

## 2.3.2 View the Production of Module

### 1) View the power generation in day

- Click  to select the date
- Click the play or pause button to adjust the play progress, or drag the slider to fast forward

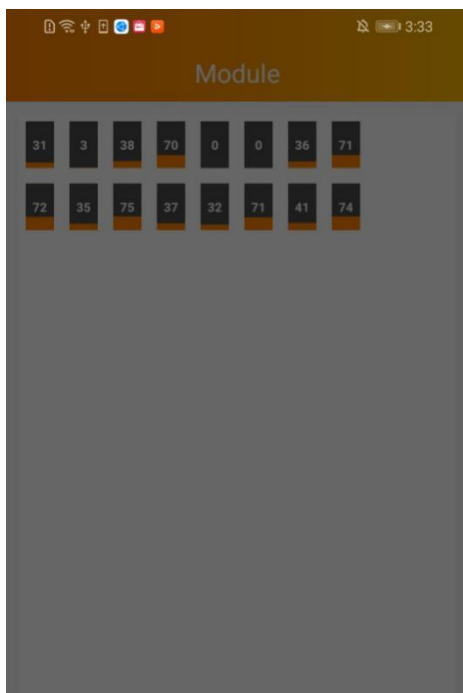

Cancel

OK

Year	Month	Day
2016	07	28
2017	08	29
2018	09	30
2019	10	31

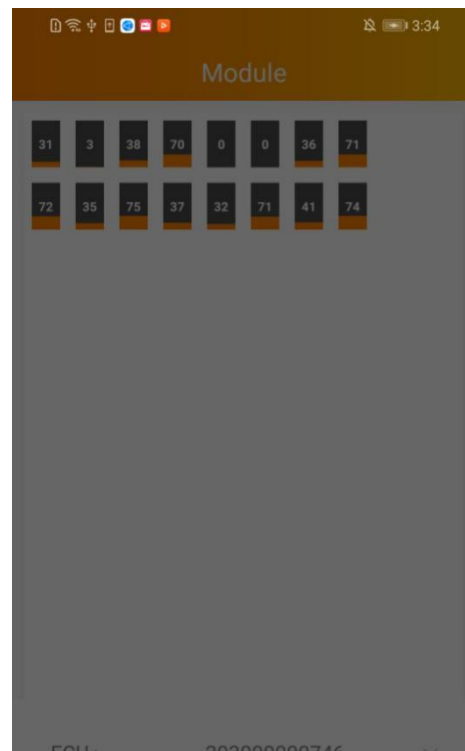

## 2) View the daily energy in 30 days

- Click  to select "Daily Energy in 30 Days"
- Click  to select the date
- Click the play or pause button to adjust the play progress, or drag the slider to fast forward

ECU: 203000000746

Cancel OK

Power Generation in Day  
Daily Energy in 30 Days

### Note:

You can change the ECU or view if your system has more ECUs or views.

## 2.4 Data

You can view the power generation of PV system in lifetime.

### 2.4.1 View the real-time data

- Turn to page "Data"
- Select the date

Move onto the curve to get the details of one point, containing the time, energy and power. Click the left or right arrow surround the date line to change the date.

### Note:

You can change the ECU if your system has more ECUs

## 2.4.2 View the statistical data

- Switch the menu "Day" , "Daily" , "Monthly" , "Yearly"
- Select the date
- Move onto the curve or column to get the details.

**Note:**

Day: Power generation of the day

Daily: Daily energy in 30 days before the selected date

Monthly: Monthly energy in 12 months before the selected date.

Yearly: Yearly energy in lifetime
