Single-Microinverter System

HMS Field Connector

HMS Field Connector is designed for the situation where a PV system only has one micro-inverter. It provides a quick and simple electrical connection between the microinverter and the grid by serving as a joining component.

HMS Plug and Play Cable

HMS Plug and Play Cable is designed for the situation where a PV system has only one microinverter. It consists of the HMS field connector, AC cable, and plug. The HMS field connector is connected to the microinverter, and the plug is connected to the household socket in accordance with local regulations.

Multi-Microinverter System

HMS Connection Cable

Make a customized AC Trunk by utilizing HMS Trunk Connectors and HMS Extension Connectors.

HMS Trunk Connector

Used to connect the microinverter's AC output to the AC Trunk, as well as to join together multiple HMS Connection Cables to create the AC Trunk.

HMS Connector

Used to form the AC cable into an AC End Cable, which completes the connection between the end of the AC Trunk and the distribution box.

HMS Extension Connector

Used to extend your cable runs when the distance between two microinverters exceeds the standard length of an HMS Connection Cable.

HMS Sealing Cap

Used to cover the unused connection port on the HMS Trunk Connector, which is typically located at the beginning of the AC Trunk.

HMS Disconnect Tool

A versatile tool that can be used to take apart connectors, tighten nuts, and loosen nuts.
